

THE NEURO TRANSFER PROCESS: TRANSFORMING JFK INTO A RECEIVING FACILITY

GOAL:

To increase transfer volume by 10% each year over a three year period of time.

TRANSFORMING JFK INTO A RECEIVING FACILITY

GOAL:

To complete 90% of all transfers annually within target times from transfer request.

Organizational Goals

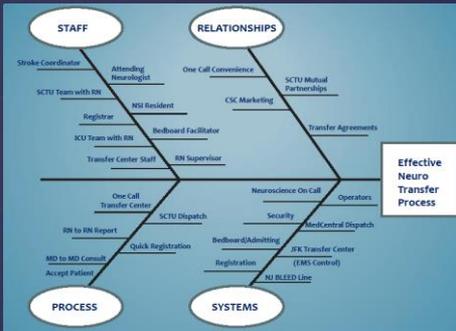

Patient Satisfaction

Joint Commission Requirements

National Patient Safety Goals (NPSG)

Growth and Expansion of NSI

Positive Financial Impact

As the first Joint Commission Comprehensive Stroke Center in the tri-state area and the eighth CSC in the country, the "Hub and Spoke" model of stroke care is necessary for maintaining this designation. For a stand-alone community hospital to function as a Hub without being part of a hospital system, an increase in transfers and working relationships with other facilities has been essential to JFK's status as a leader in Neuro care.
